

AIM Hand Rail System

The AIM Handrail System provides the flexibility of design to configure your system to meet the specific needs of your application. Our modular components provide unlimited possibilities and at the same time offer the strength and esthetic appearance. This product meets all ADA guidelines and comes with a 100% quality satisfaction Guarantee.

Installation Options:

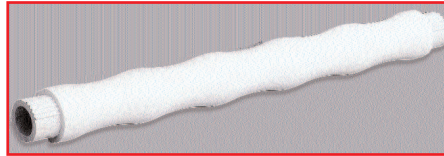

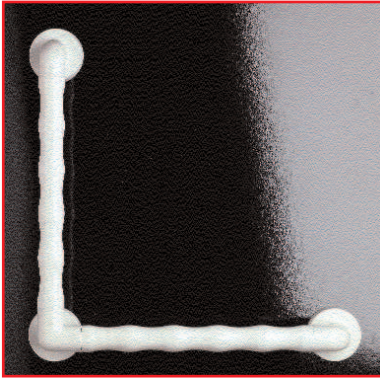

Multiple configurations can be designed for any application. Several examples are shown below for tub, shower and toilets. The AIM Hand Rail System can be installed wherever support and assistance is needed and is not limited to these select configurations.
